

MUHAMMAD MUIZZUDDIN BIN KAMARUZAMAAN

I am a dedicated and enthusiastic Software Engineering student with a strong passion for staying abreast of the latest advancements in software engineering. I possess a proactive mindset, constantly seeking opportunities to learn and apply new technologies. With my adaptability and quick learning abilities, I thrive in diverse environments and excel in collaborative teamwork. I am eager to leverage my engineering knowledge in future endeavors and contribute to the continuous advancement of the technology industry.

Education

2020 - 2024 CGPA - 3.59

**Bachelor of Computer Science
(Software Engineering)**

UNIVERSITI TEKNOLOGI MALAYSIA
JOHOR BAHRU

2019 - 2020 CGPA - 3.35

Foundation in Engineering

UNIVERSITI TEKNOLOGI MALAYSIA
JOHOR BAHRU

Skills

Language: HTML/CSS, Java,
JavaScript, C++,PHP, and Python

Database: MySQL and Firebase.

Project and Coding Management
Tool: Jira,GitHub, and GitLab

Technical Software: Visual Studio
Code, Enterprise Architecture,
Android Studio and Figma.

Essential Software: Microsoft
Word/Excel/PowerPoint and Canva.

Time-Management, Team Player,
Problem Solving, Communication

Language

English - Fluent

Malay - Native

Experiences and Projects

September 2023 - February 2024

Internship at Pejabat Daerah dan Tanah Tampin

Programmer and Asisstant Technician

- **Lucky Draw System Development:** Successfully led the development of a comprehensive lucky draw system from conception to launch, demonstrating proficiency in PHP, HTML, and JavaScript.
- **Active Directory Setup and Management:** Acquired practical experience in setting up PCs to be part of the company's domain and deepened knowledge of Active Directory features.
- **Continuous Learning and Professional Development:** Actively participated in industry events such as the Tech Master series, gaining insights into emerging technologies and industry trends.

May 2023 - May 2024

Final Year Project: Waste Management and Recycling System.

- Designed mobile application that educates and incentivizes users to adopt sustainable waste management practices.
- Project and code management tools include Jira and GitHub.
- Utilizing Flutter, Dart, and Firebase, with implementation in Visual Studio.
- Enterprise Architecture and testing in Android Studio.

January 2024

STUDPRO - A Learning Management System (LMS) for UTM

- **Improved Code Quality:** Refactored code and resolved smells using SonarQube, enhancing maintainability.
- **DevOps Integration:** Set up CI/CD pipelines in GitLab, automating testing and deployments.
- **Version Control:** Managed code and facilitated collaboration via GitLab

December 2022- February 2023

Smart Healthcare Remote System

- Web-based applications to analyze real-time patient health data.
- Using an IoT-based remote patient monitoring system using Arduino.
- Utilized HTML/CSS, JavaScript, Spring Framework, and Firebase database.
